² Department of Food Engineering and Process Management, Institute of Food Sciences, Warsaw University of Life Sciences – SGGW, 02-787 Warsaw, Poland

YOUAREIN is an online educational project aiming to empower European students and young entrepreneurs to foster innovation and sustainability in creating new food businesses, shaping the future of the agrifood industry.

The Syllabus will be structured into **four main stages** - mirroring the natural flow of product development.

The modular course structure offers flexibility and personalisation. Based on their specific profile, an automated circuit of tailored classes is created for each student, aligning with their interests and knowledge level.

We believe when it comes to education, there's no "one size fits all".

The innovative modular syllabus caters to students from diverse backgrounds, providing tailored learning circuits that optimize engagement, flexibility, and relevance. It can also be suited for every stage of their higher education journey, as modules are structured with different levels of depth.

Fostering sustainable entrepreneurship through hands-on engagement.

Through interactive activities, case studies, and interviews, participants will be able to bridge the gap between theory and practice. This immersive approach stimulates creativity and problem-solving abilities, preparing students for the challenges of the agrifood industry.
